

DOB: 03/04/06 BW: 95 WW: 645 YW: 1293

We have used Turk in every aspect of our breeding program. He has proven himself. He consistently produces the kind we want to keep in our herd. Bulls that are masculine and females that are feminine. Not many sires can produce both! He puts style, thickness, a sound foot and legs in a complete package. We have bred him to first calf heifers, mature cows and we have had several embryos calves from him. Calves average 78-85 Pound. He also puts a wonderful disposition on them. He has had Show Steers make the premium sale at Tulsa and his daughters have won several shows. His son's and daughters are in production now and proving themselves and him as a very maternal sire. One customer commented he wished he had bred Turk to every cow he owned. It's statements like this that reinforces our opinion of Turk.

Semen for Sale; \$20.00 Unit. See the [For Sale page](#) to purchase semen. Please contact us for more information. 918-783-5477
